How to remove MIPSPRO Compilers?

Published 06/04/2007

Symptom(s):

How to remove MIPSPRO Compilers?

Fact(s):

IRIX Operating System
MIPSPRO C
MIPSpro Compilers
MIPSpro Fortran
MIPSpro C

SGI Solution:

Perform the following procedure:

1) As root, type "inst"
2) Type "remove c_*" and then type "go"
3) Type "remove ftn77_*" and then type "go"
4) Type "remove ftn90_*" and then type "go"
5) Type "remove c _*", and "keep c _eoe.sw.lib", and then type "go"
6) Type "quit"

You can test that the compilers are gone with the following commands:

cc -version
CC -version
f77 -version
f90 -version
